

IDC Photo ID Solutions

for employee identification and Visitor Tracking

INTRODUCTION:

Identity, We all have one. But in today's world, the ability to verify a person's identity is increasingly useful and necessary. Whether it is for visual identification, security, tracking personnel, time keeping, or access control, personalized ID cards have become the standard tool for verifying one's identity. IDC Photo ID sets the standard for easy design and issuance of personalized ID cards.

Identification Products:

Structure Workflow: IDC's Photo ID software has a structured workflow approach from creating a database to producing an ID card. The reason workflow is so important in designing your ID card software system is future flexibility and scalability, unlike conventional ID card software systems. This unique workflow approach gives you easy functionality expansion or database migration as your system grows. You need your ID card software system to become easily expandable and not a hindrance to growth. With our unique workflow approach your ID card software is a powerful, flexible and scalable, Identification or tracking tool from the first time you install it.

For a single ID station, or a network environment with multiple ID Stations

Powerful, Flexible, Scalable:

When it comes to meeting specific or customized photo ID needs, IDC's Photo ID software provides the necessary tools to simplify database and network creation, it also provides a good migration path from existing databases. Wizard like tools makes it easy to build a database or interface with existing databases. When it comes to our ID solutions, it will help customers reduce system implementation, time, costs, and avoiding customized programming to implement business specific network requirements.

Cost saving photo ID station configurations:

IDC's Photo ID software provides additional data entry and printing stations in a network environment. The IDC's Photo ID software can also be configured for "view-only" stations providing greater flexibility to a network installation. These features are standard with Net configuration for reducing the need for customized installations. Off-the Shelf software gets you up and running quickly without hours of configuration time.

Visitor Tracking Solutions

The IDC's photo ID also offers Visitor tracking solutions: our visitor tracking scan visitors' ID (Passport or driver's license), all relevant information is captured in a database file, you can personalize your visitors badge with the visitors photograph (optional), the name of the person, persons or area being visited, the reason for the visit, and their arrival and departure times. Once the information is captured a visitors badge is produced. Reports are then a click away with the ability to set search criteria's

ID Solutions For Real-World Applications

IDCard Tek Photo ID Software Features Matrix

PC Environment						Application Integration Features					
	Express	Expert	Net	VMS	SQL		Express	Expert	Net	VMS	SQL
Windows 2k/XP	√	√	√	√	√	Import Outside Data	√	√	√	√	√
Windows Vista	√	√	√			Export ID Data to Other Applications	√	√	√	√	√
Windows 7	√	√	√	√	√	Share Photos In File Folders		√	√	√	√
Network/Multiple PCs Ready			√	√	√	Integrated w/ 3rd Party Database		√	√	√	√
Multiple Sites Ready					√	Printing Features	Express	Expert	Net	VMS	SQL
VPN / Thin Client Ready					√	Windows Compatible Printers	√	√	√	√	√
High Volume Production Ready					√	Single Side Printing	√	√	√	√	√
Database Features						Encoding Features					
	Express	Expert	Net	VMS	SQL		Express	Expert	Net	VMS	SQL
Quick Design/Setup	√	√	√	√	√	3 of 9 Barcodes		√	√	√	√
Commonly Use Data Fields	√	√	√	√	√	Most Standard Barcodes		√	√	√	√
Customizable Database	√	√	√	√	√	K-Penal printing for Infra-Red Readers		√	√	√	√
Unlimited Database records*	√	√	√	√	√	2-D Barcodes		√	√	√	√
Multiple ID Project Support	√	√	√	√	√	ISO Standard Magnetic Encoding		√	√	√	√
ODBC Support (Oracle, DB2)		√	√		√	Non-ISO /Legacy Magnetic Encoding		√	√	√	√
MS SQLServer Database					√	Multiple Data Fields Magnetic Encoding		√	√	√	√
PostgreSQL Database		√	√			HID Encoding Ready		√	√		√
Generate ID Serial & Sequence #s	√	√	√	√	√	Smart Card Interface Ready		√	√		√
Date Stamp for Card Creation	√	√	√	√	√	Security Features	Express	Expert	Net	VMS	SQL
Expiration Date	√	√	√	√	√	SecuShield™ Graphical Images		√	√		√
Customizable Incremental Badge #	√	√	√	√	√	Password Protection	Mult	Mult	Mult	Mult	Mult
Generate Custom Format Badge #	√	√	√	√	√	Expiration of Password	√	√	√	√	√
User Definable Image Compression	√	√	√	√	√	Password Protected Design Features	√	√	√	√	√
Card Design Features						Visitor Management Features					
	Express	Expert	Net	VMS	SQL		Express	Expert	Net	VMS	SQL
Multiple Card Templates	√	√	√	√	√	Onsite Registration				√	
Multiple Photo Images		√	√	√	√	Report Visitor Onsite				√	
Signature Support		√	√	√	√	Portable Reader, Visitor Activity Logs				√	
Fingerprint Support		√	√	√	√	Network Reader, Visitor Check In/Out				√	
Rotating Text	√	√	√	√	√	Variety of Visitor Activity Log Reports				√
